

2015 Edition §170.315(a)(7) Medication List					
Testing Components:					
Gap					
Test Procedure Version 1.1 – Last Updated 10/22/2015					

Please consult the Final Rule entitled: *2015 Edition Health Information Technology (Health IT) Certification Criteria, 2015 Edition Base Electronic Health Record (EHR) Definition, and ONC Health IT Certification Program Modifications* for a detailed description of the certification criterion with which these testing steps are associated. We also encourage developers to consult the Certification Companion Guide in tandem with the test procedure as they provide clarifications that may be useful for product development and testing.

Note: The order in which the test steps are listed reflects the sequence of the certification criterion and does not necessarily prescribe the order in which the test should take place.

Required Tests

(a)(7) Medication List - Enable a user to record, change, and access a patient's active medication list as well as medication history:

(i) Ambulatory setting. Over multiple encounters.

Standard(s): None

Criteria ¶	System Under Test	Test Lab Verification
(i)	<ol style="list-style-type: none"> The user selects a patient record and accesses the active medication list that has been produced over multiple previous encounters and records a new medication. The user accesses the patient's record for the active medication list, which consists of medications entered over multiple encounters. The user changes/updates the active medication list. The user accesses the patient's record for medication history, which consists of recorded and changed medications. 	<ol style="list-style-type: none"> The tester verifies the user can access a patient's medication list that has been developed over multiple encounters. The tester verifies the new entry is added to the patient's active medication list. The tester verifies that the changes/updates to the medication list are reflected in the patient's active medication list and the medication history can be accessed.

(a)(7)(ii) Inpatient setting. For the duration of an entire hospitalization.

Standard(s): None

Criteria ¶	System Under Test	Test Lab Verification
(ii)	<ol style="list-style-type: none"> 1. The user selects a patient and accesses the active medication list which includes entries from the entire hospitalization and records a new medication. 2. The user accesses the patient's record for the active medication list, which consists of medication entered over the entire hospitalization. The user changes/updates the active medication list. 3. The user accesses the patient's record for the medication history, which consists of recorded and changed medications. 	<ol style="list-style-type: none"> 1. The tester verifies the user can access a patient's medication list that includes the duration of the current hospitalization. The tester verifies the new entry is added to the patient's active medication list. 2. The tester verifies that the changes/updates to the medication list are reflected in the patient's active medication list and the medication history can be accessed.
