SMART on FHIR - Testing and Approval Process

MITRE used Epic's App Orchard for some limited SMART on FHIR testing. Below are some pointers to the App Orchard testing tool web site. Also, this document references the Epic App Orchard approval process.

Testing:
Developers who are not Epic's software customers may join the App Orchard online at https://apporchard.epic.com. During the enrollment process, new Vendor Contributors choose a program tier and associated benefits and agree to the program's terms.

Approvals:
https://apporchard.epic.com
Assuming the "SMART on FHIR" App has been written; it can take 3-4 weeks to get Epic's approval. This process consists of submitting the App, answering questions related to software claims, security, safety and expectations. It also includes a review by the Epic technical team and possibly Epic leadership.

- Note: Troubleshooting is billable. (e.g. if there is a bug in the "SMART on FHIR" App for which Epic's assistance is required)
- Cost of App Approval/Listing (as of: February 2019)
    - Cost of $1,000 annually to join the Epic App Orchard as a Bronze member with one free App approval/listing
    - Cost of $2,000 for each additional App approval/listing
    - If listing at the Epic App Orchard is not wanted, it is still the same cost as the approval/listing costs
