

IMMUNIZATION INTEGRATION PROGRAM

In collaboration with:

ONC Approved Testing Partner Semi-Annual review

January 18, 2019 1:00 – 2:00 PM ET

Agenda

- I. Introductions
- II. Progress review of HIMSS IIP maintenance and development
 - a) Success stories, challenges, lessons learned
 - b) Patches, upgrades or planned enhancements
 - c) Documentation of change history for tool and/or plan
- III. Unresolved issues
- IV. Policy and technical alignment
 - a) Review of test procedures and CCGs
 - b) Communication channels to support alignment
- V. Review of Responsibilities and Scope of Work in MOU
- VI. Open Discussion

Introductions

Floyd Eisenberg, MD, CHC, Technical Manager

Tom Leary, HIMSS, Program Lead

Eli Fleet, HIMSS Co-Program Manager

Joyce Sensmeier RN, HIMSS, Content Advisor

Audrey Garnatz, HIMSS, Project Manager

Gila Pyke, Drummond Group, IIP Testing Lead

Progress review of maintenance and development - Success stories, challenges, lessons learned

- HIMSS IIP continues to maintain the capabilities and guidance, the test specifications and test plan based on annual feedback from the Technical Advisory Panel (TAP)
- Recognized vendors continue to provide positive feedback about the value of the program, while HIMSS and Drummond Group work to expand awareness of the program in the next phase.
- Received request for gap analysis between HIMSS IIP program and ONC F1 Cert criteria.
- Increase in the stability of the test tool
- Working toward increased stability of the test plan

Progress review of maintenance and development - Patches, upgrades or planned enhancements

- Updates made to the test plan (see next slide)
- Technical Advisory Panel (TAP) will meet January 30
 - Will provide ONC with an update at our next review
- Gap Analysis by Drummond in process

Progress review of maintenance and development - Documentation of change history for tool and/or plan

- Test Plan 7.0 Updates:
 - Adjustments of patients' birth dates to stay within immunization schedule windows
 - Minor test plan editorial items corrected

Unresolved issues

- NIST tool is down as part of the partial government shutdown
- Drummond Group is hosting versions of all NIST tools during government shutdown, however test plan 7.0 is not currently available.
- IIP testing can proceed with test plan 6.0, while Drummond Continues to work to resolve tool issue

Policy and technical alignment - Review of test procedures and CCGs

- Drummond Group developed a Gap Analysis to guide vendors in identifying additional functionality required to test with IIP
- Test Plan steps/procedures have not changed at this time
- Test Plan and Capabilities document will be updated after TAP meeting

Policy and technical alignment

- HIMSS has updated the IIP website and marketing materials to include the Approved Testing Partner Seal

- Example Web Ad:

Review of Responsibilities and Scope of Work in MOU

- No anticipated changes to scope of work or MOU at this time

Open Discussion

- Immunization Collaborative to be launched at HIMSS19
