

Consumer Health Data Aggregator Challenge & Provider User Experience Challenge

March 20, 2017

Provider User Experience Challenge Winners

Phase 1

- Duke Health System / Intermountain Healthcare / University of Utah Health Care
- Herald Health Technologies
- PHRASE Health
- WellSheet

Phase 2

- First Prize: Herald Health Technologies
- Second Prize and Connector Award: Duke Health System / Intermountain Healthcare / University of Utah Health Care
- Honorable Mention: PHRASE Health

Interoperability In Action Day

Herald Health Slides Not Provided

Multi-Institutional, Multi-EHR Collaboration to Enhance a Neonatal Bilirubin SMART on FHIR Application with Clinical Decision Support

ONC Interoperability in Action Day

March 20, 2017

Kensaku Kawamoto, MD, PhD, MHS Associate Chief Medical Information Officer, Univ. of Utah

> On behalf of the project team from: University of Utah Health Care Intermountain Healthcare Duke Health

Disclosures

- In the past year, I have been a consultant or sponsored researcher on clinical decision support for:
 - Office of the National Coordinator for Health IT*
 - McKesson InterQual
 - Hitachi

*via ESAC, SRS, A+ Government Solutions, and Hausam Consulting

Multi-Institutional Collaboration

Kensaku Kawamoto, MD, PhD, MHS Associate CMIO Steering Member, IAPPS

Carole Stipelman, MD, MPH Medical Director, University Pediatric Clinic

Scott Narus, PhD, MS Chief Clinical Systems Architect

Ricky Bloomfield, MD Director of Mobile Technology Strategy

Robert Lenfestey, MD Neonatologist and Clinical Faculty

Multiple EHR Platforms

- Epic
 - Univ. of Utah
 - Duke
- Cerner
 - Intermountain
- CareWeb

- Healthcare Services Platform Consortium (HSPC)

• Others TBD

Project Background/Motivation

- EHR vendors are increasingly supporting SMART on FHIR to extend the EHR through interoperable "Apps"
- Healthcare organizations across various EHR platforms could mutually benefit through collaborative development of SMART on FHIR Apps
- Univ. of Utah, Intermountain, and Duke are collaborating to extend an existing bilirubin App with decision support as requested by our physicians
- We welcome collaborators and will make all content available free and open source

Baseline Bilirubin App, Integrated with Epic (developed by Intermountain)

Support of HL7 Decision Support Standards

- Quality Improvement Core (QICore) FHIR Profiles (<u>http://hl7.org/fhir/current/qicore/</u>)
- HL7 Decision Support Service (<u>http://www.hl7.org/implement/standards/product</u> <u>brief.cfm?product_id=12</u>)
- FHIR Clinical Reasoning Module (<u>http://hl7-</u> <u>fhir.github.io/clinicalreasoning-module.html</u>)
 - Being unified with CDS Hooks specification (<u>http://cds-hooks.org/</u>)

Status

- 1.0 Release complete
- Full integration with Epic & CareWeb EHRs
- In production clinical use at University of Utah
- Positive provider feedback
- Enhancement requests being incorporated for v2.0
- Aiming for wide dissemination of 2.0 Release
- Awarded HHS Provider User Experience App Challenge Awards https://www.challenge.gov/challenge/provider-user-

experience-challenge/

Demo within HSPC CareWeb EHR Platform

http://docker.bmi.utah.edu:8081/cwfdemo-webapp/

Lessons Learned

- Initial learning curve fairly high
 - Hopefully will become easier as Interoperable
 Apps and Services become more "mainstream"
- Security is a critical consideration
- Standards (e.g., FHIR) are still evolving and require greater specificity for true plug-andplay interoperability
- Cross-institutional (and cross-platform) collaboration can significantly accelerate development

Thank You!

Kensaku Kawamoto, MD, PhD, MHS

Associate Chief Medical Information Officer Director, Knowledge Management and Mobilization Assistant Professor, Biomedical Informatics
