

Identity Tiger Team Kick-Off

P2 FHIR Taskforce

Agenda

Topic	Duration
Introductions	15 minutes
Antitrust Notice	5 minutes
Identity Tiger Team Goals	20 minutes
Admin <ul data-bbox="191 763 789 921" style="list-style-type: none">• Working Session Frequency• Collaboration channels• Communication	10 minutes
Next Steps	5 minutes

Meet the Team

Name	Organization	Role
Adam Culbertson	HIMSS	Identity Team Member
Andrew Gregorowicz	The MITRE Corporation	Identity Team Member
Dustin Henderson	Optum	Identity Team Member
Julie Maas	EMR Direct	Identity Team Member
Meena Jambulingam	Optum	Identity Team Lead
Matt Peeling	Mosaic Community Services – Sheppard Pratt Health System	Identity Team Member
Patrick Murta	Humana	Taskforce Chief Architect
Paul Oates	Cigna	Taskforce Chief Architect
Diana Ciricean	ONC	ONC Point of Contact for Identity
Carmen Smiley	ONC	ONC Point of Contact for Identity

P2 FHIR Taskforce Antitrust Notice

The ONC Payer-Provider (P2) FHIR Taskforce (Hereinafter “Taskforce”) is committed to full compliance with existing federal and state antitrust laws.

All members involved in the Taskforce effort, including its advisory groups, will comply with all applicable antitrust laws during the course of their activities. During Taskforce meetings and other associated activities, including all informal or social discussions, each member shall refrain from discussing or exchanging competitively sensitive information with any other member. Such information includes, but may not be limited to:

- Price, premiums, or reimbursement charged or paid for products or services
- Allocation of customers, enrollees, sales territories, sales of any products or contracts with providers
- Any other competitively sensitive information that is proprietary to a member company

Members should not bring confidential information or intellectual property (hereinafter “Intellectual Property”) owned by their respective member companies into Taskforce meetings. To the extent such Intellectual Property is shared with the Taskforce that shall not be construed as a waiver of member company’s rights to, or ownership in, the Intellectual Property.

If you have any specific questions or concerns, seek guidance from your own legal counsel.

P2 FHIR Task Force

ONC is convening a group of highly-motivated payers, health information technology and healthcare organizations to collaborate on a focused effort to accelerate development of a joint FHIR API, and to iterate on the improvements of the specifications to reduce variability in industry implementation.

Task Force Goals and Objectives

- Identify and prioritize a list of broad-based architectural, technical or process barriers that are likely to curtail widescale FHIR deployment.
- Develop practical, consensus based, solutions to these barriers that could accelerate adoption, including a set of consensus-based implementation guides that drive consistency of FHIR based data exchanges between Payers and Providers.
- Create a knowledge sharing process to share, update and publish consensus best practice
- Identify a list of barriers that need regulatory solutions and document same for consideration to regulatory process
- Successfully conduct/coordinate/share demonstration projects (or projects) between EHR/HIE and payer end points that show value, will scale, and will not require fundamental new standards development. This is a major outcome we are looking for....demonstration examples.
- Design of a national architecture to enable FHIR based clinical clearinghouse solutions

P2 Tiger Teams

This is us

Tiger Team	Area of Focus
Ecosystem Use Cases	Creating use cases that will assist the rest of the tiger teams in directing their efforts and driving their solutions
Identity	Identifying identity-proofing and patient-matching solutions across multiple types of users
Directory, Versions and Scale	Resource directory solutions and ensuring a process to handle versioning and the anticipated scale of resources
Testing and Certification	Specification for testing and certification of the requirements defined for identity, security, Endpoint discovery, scaling and exchange process
Exchange Process (metadata)	Common metadata and process conventions
Security	Identifying scalable solutions for security authorization and authentication processes
Pilots	Identify the pilot models, technology, and participants needed to demonstrate the efficacy of the documentation and approaches created by other tiger teams

Identity *Draft* Deliverables

Your feedback on deliverables
is essential

This Tiger Team will focus on identifying identity-proofing and patient-matching solutions across multiple types of users

- Identify appropriate national standards for individual and organizational identify proofing.
- Define approach to implementation and testing. (Providers first and then consumers/patients)
- Identify standards for reconciliation of patient identification across multiple sources. (e.g. patient matching)
- Build a proof of concept that demonstrates the critical architectural and technical capabilities required to implement identity cross-walk in real-time during the course of a FHIR transaction

Administrative Info

- Identity working meetings frequency and preferred day of week
- Potential regular check-ins with related teams, particularly Use Cases and Security (maybe every other month/every quarter?)
- Collaboration tools
 - ONC wiki: Deliverables, Communications, maybe Calendar and meeting agenda
 - Doodle for scheduling ad-hoc meetings beyond regular working sessions
 - Your choice of collaboration tools for smaller breakout sessions
- Communication
 - Monthly progress reports to ONC and coordinating committee [Meena]
 - Email and Wiki updates on other Tiger Teams [All]
 - Email poll for agenda items for working sessions a week prior [Meena]

Next Steps

- Begin regular working sessions mid-Jun
- Collaboration through email/wiki on deliverables prior to first meeting
- Team review and sign off on deliverables and first milestones at first meeting

Thank you!
