EMDI Pilot Program Alignment

careMESH is focused on addressing the same healthcare challenges

- Improve bi-directional, structured medical record sharing
- Create secure, accelerated workflow processes
- Reduce reliance on fax, paper, postal mail
- Reduce data entry and associated errors
- Reduce provider burden

Native “any-to-any” communications (*via national directory, no integration required, rapid identity-proofing, etc.*)

Leveraging existing infrastructure to keep records digital and support Promoting Interoperability (*e.g. electronic referral loops*)
