

Please consult the Notice of Proposed Rulemaking (NPRM) entitled: *2015 Edition Health Information Technology (Health IT) Certification Criteria, 2015 Edition Base Electronic Health Record (EHR) Definition, and ONC Health IT Certification Program Modifications* for a detailed description of the proposed certification criterion with which these testing steps are associated.

1. Required Tests

Note: The order in which the test steps are listed reflects the sequence of the certification criterion and does not necessarily prescribe the order in which the test should take place.

1.1 Enable a User to Record, Change, and Access a Patient’s Family Health History

Evaluate the capability of Health IT Module to enable a user to record, change, and access a patient’s family health history electronically, according to, at a minimum, the concepts or expressions for familial conditions included in the SNOMED CT® September 2014 Release.

Item #	Technical Outcome	Test Lab Verification	Test Approach
1	A user records, changes, and accesses family health history in the standard specified at §170.207(a)(4) (the September 2014 Release of SNOMED CT®).	The tester verifies that family health history can be recorded, changed, and accessed in accordance with the familial concepts ore expressions included in the standard at §170.207(a)(4) (the September 2014 Release of SNOMED CT®), at a minimum.	At a minimum, visual inspection.

2. Document History

Version Number	Description of Change	Date
1.0	Released for Public Comment	March 17, 2015

3. Dependencies
