

Notes from the March 27, 2020 call

The outreach for venues for the HIMSS demo has produced several opportunities:

- [LeadingAge State Technology Initiatives](#) - they were looking for a demo on April 1, which was a too short of a notice. Looking to re-schedule.
- DirectTrust Clinicians Steering Workgroup - Noon Eastern April 14 meeting. They plan to also invite the Physician EHR Coalition ([PEHRC](#)). They can also provide the EMDI questionnaire to attendants.
- The Annual DirectTrust Summit in June - there is a 360X demo already planned, not the same as the HIMSS demo.
- HIMSS LTPAC committee - Dr. Miller has a call with them next week.
- The VA - They are interested to see the demo, and they want to invite the DoD. Dr. Miller has a call with them on April 2.
- The DoD - separately or with VA, no suggested timeframe
- The CMS EMDI Initiative (which is sponsoring the first production 360X pilot) would like to see the demo. They are working on a June date.
- NCQA is interested in a presentation (not demo).

The work on the 360 XL IHE profile will continue with volume 2. Volunteers for editors are welcome. Mid-April Vassil can provide guidance on the process and available tasks.
