

HL7 Artifacts

The eLTSS artifacts below have been developed, balloted and published through HL7

eLTSS FHIR Implementation Guide	The eLTSS FHIR Implementation Guide (IG) Release 1 - US Realm is based on FHIR R4. It was developed to support the exchange of data generated during the planning and provision of long-term services and supports and is currently scoped to data commonly found on LTSS service plans.	
eLTSS Informative Document	The <i>HL7 Cross-Paradigm Information Sharing for Electronic Long-Term Services & Supports (eLTSS), Release 1 - US Realm</i> Informative Document was balloted through the September 2018 HL7 ballot cycle. This document describes how Home and Community-Based Services (HCBS) data requirements, documented in the 56 data elements included in the eLTSS Dataset, can be represented for exchange and sharing using nationally recognized content and vocabulary standards.
