

Notes from the July 10, 2020 call

[ONC Tech forum](#) - 360X will have a booth in the "virtual exhibition hall". We may be able to have a live booth presence, there were several volunteers to be present during the the event. We will discuss setup and other details on 7/17 call.

Discussion on the top next proposed project for 360X - transfers from LTAC facilities to Acute care facilities

- Main points for SNF to acute transfer:
 - initial transfer is most commonly to the ED - referral for consultation
 - ED transfers have very specific, targeted information requirements from the SNF
 - In many cases patient is then transferred back to SNF - loop is closed
 - In other cases patient is moved from ED to Hospital admission
 - Hospital admissions have different information requirements to be obtained from the SNF, mainly to inform inpatient nursing staff how the patient needs to be managed
 - Discharge from hospital admission can be to same SNF or to a different one
- Steps to consider
 1. Referral to ED
 - a. Is this a request that can be denied, or is it more like a notification to the ED (expect this patient)?
 - b. Need to describe the data needed from SNF to ED
 2. Discharge from ED back to SNF
 - a. Notification, with a summary of what happened in the ED - close the loop outcome
 3. Transfer to Hospital admission
 - a. Notification from ED/Hospital to SNF
 - b. Response from SNF to Hospital with additional information
 - c. Can we keep the referral ID? Should we call it something else?
 4. Determination whether the patient will be discharged to the same SNF
 - a. Can be due to timing - whether the patient bed can stay on hold for time necessary to be at the hospital - possibly a notification from SNF to hospital
 - b. Patient may decide to look for a different facility - notification from hospital to SNF
 5. Patient Discharge - close the loop
 - a. to same SNF - follow steps from 360XL for an already selected facility
 - b. to a different SNF - use the full 360XL process - request, select, transfer

We will continue discussions during the 7/24 call.
