

Notes from the July 31, 2020 call

Review of ONC Tech Forum information and signup.

Update on outstanding work on existing specifications

- AUT HL7 segment information was recorded (thanks Chuck!)
- 360XL has been submitted to IHE for public comment

Update on the discussions with the Ohio Health Information Partnership (OHIP)

- They are very excited about 360X becoming available from vendors
- They have a very strong statewide foodbank network (Ohio Association of Foodbanks)
- They want to see how using 360X can help with social care referrals
- Challenges:
 - Clinical information is not meant to be sent with the request
 - Support for 360X for initiating clinical referrals does not easily transfer to extra-clinical referrals (different users, different workflows)
 - If we add social care referrals to 360X, it will likely be years before implementations are available to users, and OHIP is looking for quick turnaround.
- We will continue discussions next time
