

# Notes from the August 21, 2020 call

We reviewed the data elements collected by [Partners Healthcare](#) for transfers from SNF to ED. While not all elements are applicable all the time, together they provide a comprehensive snapshot that helps the ED to quickly assess the needs of the patient.

Based on these data elements, we can try to map them to existing C-CDA sections and work on building the content for the initial transaction.

Volunteers to take up this task, as well as visualizing the workflow transitions, are welcome!
