

FAST Action Plan Overview Webinar

The ONC FHIR at Scale Taskforce (FAST) Action Plan; Step into the *FAST* Lane of Ecosystem Infrastructure & Scale Your Solutions

March 18th, 2021

12:00 - 1:30PM ET

Join us on March 18th at Noon ET for an update on the ONC FHIR at Scale Taskforce (*FAST*).

Despite COVID-19 challenges, by leveraging industry collaboration and a transparent iterative process, *FAST* advanced the taskforce recommended approaches addressing key infrastructure barriers to FHIR based solutions scalability and set them on a path to standards development and implementation readiness.

This session aims to provide an overview of the *FAST* Action Plan, which outlines the path forward and status of the *FAST* solutions. It will also offer an opportunity to learn how the industry (that's you!) can stay involved in the *FAST* journey, whether through the implementation guide development process, Connectathons, *FAST* core capabilities pilots testing and more.

Therefore, join us to learn more about these *FAST* scalability solutions and their path forward:

- National Healthcare Directory
- Hybrid/Intermediary Exchange (Exchange with or without Intermediaries)
- Scalable Registration, Authentication, and Authorization for FHIR Ecosystem Participants
- National Standards Based Approaches for Individual Identity Management
- Methodology for Supporting Multiple Production Versions of FHIR
- US Wide Scaling Requirements for FHIR RESTful Exchange Intermediaries
- FHIR Testing and Certification Platform
- Comprehensive Pilot Plan
