

# Release Notes

## Version 1.0

Released 10/14/2015.

Initial release.

[Source code](#)

[JIRA project](#)

## Version 1.0.1

Released 3/31/2016.

Relaxed several of the "Test Data Conformance Events" (context-specific) rules that were too strict in their format.

Fixed an issue with in-line XML namespaces.

Fixed an issue with ID comparisons from different sections.

Updated the test data. [Test data change log](#)

[JIRA issues in this release](#)

## Version 1.0.2

Released 5/3/2016.

Updated "Test Data Conformance Events" (context-specific) validation:

- Removed context-specific validation checks that enforced a code in the Indication template
- Updated context-specific validation for email and telephone URIs according to RFC 6068 and RFC 3966

Updated the test data. [Test data change log](#)

Added a link to the [Juror Document](#).

[JIRA issues in this release](#)

## Version 1.0.3

Released 6/14/2016.

Updated "Test Data Conformance Events" (context-specific) validation:

- Removed context-specific validation checks that enforced a code in the Indication template

[JIRA issues in this release](#)

## Version 1.0.4

Released 8/31/2016.

Fixed bug that occurs during vocabulary validation when displayName is null.

[JIRA issues in this release](#)

## Version 1.0.5

Released 3/15/17.

Fixed an issue with the tool attempting to validate the 2nd or 3rd instances of an element when it didn't exist.

Allow ICD-O-3 codes in 4- or 5-digit format.

Expanded list of null flavors allowed in multiple locations.

Check @extension attribute only when provided with @root.

Updated the TNM code system and the Family Member Value Set.

Allow any ordering of multiple raceCodes.

Check only for the date in effectiveTime and not the specific time.

Updated the test data. [Test data change log](#)

Details of issues can be seen in the file attached to [CRIGTT-78](#).

[JIRA issues in this release](#)
