

3.1 Release Notes

- [General Remarks](#)
- [New Features in v3.1](#)

General Remarks

The Direct Certificate Discovery Tool (DCDT) v3.1 is a new release to meet version 1.2 of the [Applicability Statement for Secure Health Transport](#).

New Features in v3.1

There are two new Discovery test cases in DCDT, D17 and D18.

Test case D17 checks a system's ability to utilize Certificate Revocation List information in order to check if a certificate has been revoked.

Test case D18 checks a system's ability to utilize Authority Information Access extensions in order to verify a certificate's chain of trust.
