## Description

**TOPLINE HEALTHCARE** is a **CMS APPROVED** performance based leading edge Solutions and Technology Company with in-depth knowledge and experience in the healthcare industry. With dynamic partnerships and proven formulas of success, we help you through the challenges facing you today and in the upcoming future. We are committed to outstanding improvement in clinical documentation, provider education, efficient workflows, cyber-security, growth revenues and overall patient care. [Read More](#)

## Points of Contact

As a leading expert with over 20 years of experience in healthcare and research, Mark has a proven record of forecasting the trends in the healthcare industry. In his book, *Ultimate Guide to Win* (published July 21, 2013), Mark predicted critical changes in Medicare and health care that are happening today. In addition to helping hospitals drive revenue growth, he led a CMS pilot program to its successful completion in less than a year. It was in this program where the implementation of Codeable Language and its processes were proven. Mark is now utilizing his abilities to find simple solutions to complicated problems by solving one of the country's most important problems today.

Topline CEO

**Mark Kimmel, Ph.D., Co-Founder**  
President / Director of Development  
Creator of Codeable Language

Topline Co-founder

**Susan Hemme, Co-Founder**  
Executive Vice President

With more than 25 years of experience in project management, Susan has brought her knowledge and resources to the healthcare industry at this pivotal time. She is instrumental in the founding and building of TOPLINE Healthcare, as well as assisting in the successful implementation of the Codeable Language system in a CMS pilot program. As an expert in the field of project management and written communication, Susan uses her skills to ensure success in documentation, program management and certification, as well as the continued dynamic growth of TOPLINE Healthcare.

## Pilots(s)

Name	Description	Stream	Status
<a href="#">EMDI PMD Workflow Within EMR</a>	Create an end-to-end solution that provides interoperability of multiple systems. <a href="#">Read More</a>	<a href="#">EMDI eClinical Templates</a>	Complete
