Welcome to the Healthcare Directory TLC Page

The Office of the National Coordinator for Health Information Technology (ONC) has convened a Healthcare Directory Technology Learning Community (HcDir TLC) quarterly on the second Friday of the month at 12 pm ET. Public and private stakeholders are encouraged to participate in the HcDir TLC to share their experiences and perspectives on healthcare directory issues such as interoperability, data quality, and existing and evolving standards. In addition, the HcDir TLC will seek to explore non-technical issues such as governance and sustainability, recognizing that technical solutions alone are insufficient for successful implementation of healthcare directories.

The Healthcare Directory Technology Learning Community meetings are currently suspended. We are planning for a second workshop to be held June 13th and 14th 2019 in Washington, DC. Details can be found [here](#).
